Projects

Wiki Search Application   Project Link: *giri1wikipedia.ccbp.tech*

Developed custom Wikipedia search application where users can search and view curated results and can see detailed explanations in Wikipedia by clicking on the specific result.

- The displayed list of search results with HTML list elements with hyperlink as URL, styled list using CSS, Bootstrap and implemented responsiveness using Flex properties and CSS Box model.

- Fetched search results from a server asynchronously using fetch GET HTTP API call. When a user clicks on a particular result, opens the website in a new tab by using the target attribute of the anchor tag in HTML.

Technologies used: HTML, CSS, JS, REST API Calls, Bootstrap

To-do List Web Application   Project Link: *giri1todosapp.ccbp.tech*

Developed persistent to-do application with CRUD operations to the track list of tasks.

- The displayed list of to-dos with HTML list elements, styled to-do list using CSS, Bootstrap
- Implemented to-do crud operations by using JavaScript event listeners and updated UI dynamically by using JavaScript DOM operations.
- Used Arrays, Objects, and their methods during to-do list CRUD Operations Persisted to-do list state on page reloads using local storage methods.

Technologies used: HTML, CSS, JS, Bootstrap

Tourist Places Application   Project Link: *giri1tourism.ccbp.tech*

Developed tourism responsive website where users can browse through the content, videos, and images of popular destinations.

- Implemented mobile-friendly layout using different HTML blocks, inline elements, and Styled using CSS3 properties such as background, flex, and CSS box model properties.
- Implemented multiple images of a particular destination in a carousel using bootstrap carousel and virtual tour videos using bootstrap embed components.

Technologies used: HTML, CSS, Bootstrap
